**FYI** The Centers for Disease Control and Prevention (CDC) recommends disinfecting surfaces for an extra level of protection against germs. According to the CDC, infectious diseases have a profound effect on business costs and worker availability. Since many infectious germs can live on surfaces for hours or even days, regular disinfecting is an essential part of the cleaning process. Disinfecting is especially important in areas that are commonly touched (like doorknobs and telephones), as well as foodservice and restroom areas. Unlike standard cleaning with plain soap and water, EPA Registered disinfectants contain ingredients that actually destroy germs, creating a cleaner, healthier workplace.

**FYI** RTD® (Ready-to-Dispense) is JohnsonDiversey's maintenance-free dilution control system. This economical, easy-to-use system requires less training, installation and maintenance than traditional dispensing systems. Concentrated formulas, specially designed bottles and a simple Water Hook-Up Kit work together to provide accurate dilution and dispensing directly from the bottle. The specially designed 1.5-liter bottle attaches simultaneously to both a water source and a spray bottle. Simply rotate the control knob to dispense an accurate combination of water and formula into the spray bottle. Once the spray bottle is full, you can begin cleaning with confidence.
