EchoMop: The Environmentally Responsible Mop Head

PET (polyethylene terephthalate) is a polyester plastic commonly used for bottling water, soft drinks, cosmetics and other liquid products. Although popular for packaging, PET contributes to landfill waste and the use of natural resources. For example, in 2002, 2 billion lbs. of PET bottles were wasted, and these bottles will not break down for at least 2,000 years. There are currently four tons of PET wasted for every ton recycled—yet just eight 16-oz. PET bottles can make 1 sq. ft. of polyester carpet, one x-large t-shirt, two baseball caps or one large mop head. Additionally, recycled PET can be used in athletic shoes, luggage, automotive parts, industrial strapping and more. Purchasing products made from recycled PET can help diminish landfill waste and conserve natural resources.

1. What type of head should I choose?

Choose natural cotton for general mopping. Rayon is ideal for finishing. Looped end/tailband mops reduce linting, fraying and unraveling. The tailband also prevents tangles and provides more coverage with each stroke.

2. Are mops available for special uses?

Yes. We offer mops with a built-in scrub pad, anti-skid mops, rough floor mops, cleanroom mops, antimicrobial mops and special finishing mops. Some styles are available in different colors; color-code by mopping use.

3. What mop handle do I need?

That depends on the mop head style, the headband size and special features desired. A standard head uses a clamp style handle; a saddleback head uses a clamp or gripper style handle; a lieflat head requires a lieflat screw-in handle. Some handles hold only mop heads with a certain size headband. There are antimicrobial handles and quick-change handles, and handles with various connecting mechanisms.
